

IBS 2019 - A great success for SAUTER Régulation

SAUTER Régulation exhibited its new products at the 10th edition of the IBS (Intelligent Building Systems) exhibition on 2 & 3 October 2019 in Paris.

This exhibition allowed those involved to present:

- 1) The new modulo 6 range of automation stations – <https://www.sauter.fr/innovation/modulo-6>
- 2) The new mobile application “Mobile Building Services” – <https://www.sauter.fr/innovation/sauter-cloud>
The new web server “Moduweb Unity” – <https://www.sauter-controls.com/wp-content/uploads/2019/07/1039046-8.pdf>
- 3) The new version of SAUTER Vision Center – <https://www.sauter-controls.com/fr/produits/sauter-vision-center>
- 4) ecos504-IoT – <https://www.sauter.fr/sauter-lance-ecos504-iot-une-solution-innovante-et-intelligente-pour-la-domotique-et-lautomatisation-des-batiments>
- 5) Smart Actuator

During this exhibition, SAUTER Régulation, **recognised as an expert in the field of Smart Buildings**, participated in two conferences:

- 1) Mr Stéphane Marcinak, President of SAUTER Régulation, spoke at the conference:
“Smart Buildings and GAFAM: competitors and/or partners of traditional suppliers?”
73 people attended this conference.
- 2) Ms Prudence Soto, Director of SAUTER Régulation, was involved in the conference:
“How to manage a Smart Building project? What decision-making chain is to be put in place?”
94 people attended this conference.

SAUTER Régulation’s participation in this major event confirms its position as a major player at the forefront of innovation in the field of Smart Buildings.
