## **SAUTER Germany receives 2020 Trust Award of the German ventilation/air conditioning/cooling industry**

*The winners of the LüKK Trust Award have been announced: SAUTER Germany wins in the category "Building Automation, Management and Automation Level". The German subsidiary of the SAUTER Group has thus maintained its first place originally awarded in 2017.*

The Trust Award of the German ventilation/air conditioning/cooling industry (LüKK) is awarded by publishing house [cci Dialog GmbH](#) and is aimed at manufacturers and suppliers of products and systems in the field. For the second time in the history of this industry honour, planners, plant manufacturers, operators, facility managers and energy consultants were given the opportunity to evaluate numerous participating companies. The organiser collected their marks from 15 January to 8 April. Over 700 people took part in the voting.

### **Appreciation for the entire workforce**

The LüKK Trust Award was created in 2017 on the occasion of cci Dialog's 50th anniversary and is awarded in a total of 14 product categories. The jurors not only rate the quality of products, but also evaluate the general satisfaction with planning support, overall reliability and after sales service. Finally, the question "Would you recommend this company to others?" is a very concrete way of expressing trust.

"We are very pleased to be awarded first place in the category 'Building Automation'", said Werner Ottilinger, Managing Director of SAUTER Germany. "We are proud that we were able to maintain our 2017 ranking. This recognition comes at a difficult time for the industry and motivates us to maintain our peak performance. Our thanks go to all our customers and partners in the market who continue to place their trust in us. On behalf of

the Management Board, I would particularly like to thank all our employees, who justify this trust with their daily performance".

### **About SAUTER**

As the leading provider of solutions for building automation technology in Green Buildings, SAUTER ensures good climate conditions and a sense of well-being in sustainable environments. SAUTER is a specialist in developing, producing and marketing products and systems for energy-efficient total solutions, and offers a comprehensive range of services to ensure the energy-optimised operation of buildings. Our products, solutions and services enable high energy efficiency throughout the entire life-cycle of a building – from planning and construction through to operation – in office and administrative buildings, research and educational facilities, hospitals, industrial buildings and laboratories, airports, leisure facilities, hotels and data centres. With over 100 years' experience and a track record of technological expertise, SAUTER is a proven system integrator that stands for continuous innovation and Swiss quality. SAUTER provides users and operators with an overview of energy flows and consumption, and therefore of the development of the costs involved.
