Divisions

SAUTER Systems

Building automation for maximum energy efficiency.

SAUTER convinces customers worldwide with intelligent hardware and software as well as energy-efficient solutions for building management and room automation. Well-designed workflows provide you with planning security and ensure efficient project processing. Numerous challenging and certified projects are a testament to our experience and guarantee our customers a high level of investment security with minimum energy consumption.

SAUTER Services

Value retention, reliability and energy management.

SAUTER's expert service personnel provides customers with round-the-clock support to ensure reliable operation in line with all relevant standards, maintain the value of the building and optimise energy consumption. Error-free system operation is guaranteed. Our web-based «Digital Cloud Services», consisting of «Remote Management», «Performance Management», and «Customer Portal», create an overall digital experience.

SAUTER

SAUTER Components

Component and OEM solutions for intelligent building automation.

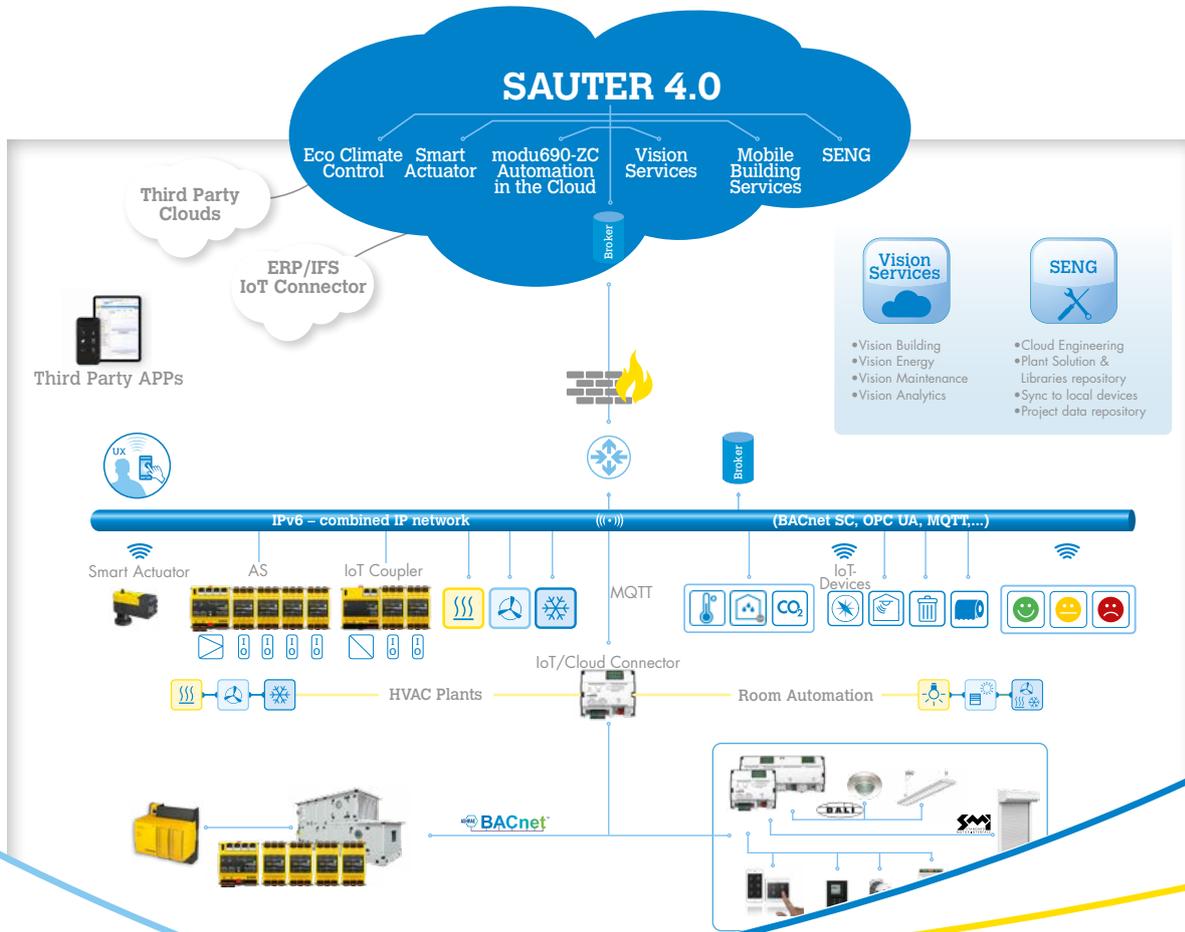

Tried and tested measuring and control technology, from automation level to field level, testify SAUTER's expertise in development and production. Our hardware and software products designed in Switzerland are impressive – both as individual components and as part of a system. They include a new generation of IoT devices that store system data directly in the "SAUTER Cloud", where they can be analysed and accessed flexibly.

SAUTER Facility Services

A partnership for the day-to-day operation of buildings.

Our customers' needs in terms of building operation could not be more diverse. Whether the tasks are of commercial, technical or infrastructural nature, or comprehensive energy management is required: SAUTER provides expert support in all phases of a building's life cycle.
