Imagine having a real-time, at-a-glance view of the status of your entire building and property portfolio. The dashboards in the SAUTER Customer Portal deliver exactly this level of transparency.

Facility Manager, SAUTER Germany

The user-oriented dashboards provide:

-  Key metrics on space utilisation, energy consumption, CO₂ emissions and operating costs.
-  Maintenance schedule storage with status indicator
-  Overview of service reports, action plans and optimisation recommendations.
-  Immediate, real-time insights into system status and alarm notifications.

Additional features of the Customer Portal

- High-level information from the SAUTER Vision Center
- Project and system information
- Integration with SAUTER Remote Management
